HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

DETAILED ACTION

EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Eric J. Franklin on January 8, 2009.

The application has been amended as follows:

In the specification, on page 10, after the third paragraph, please replace the text "-- swathing --" with "-- switching --".

In claim 25, line 5, please replace the text "-- actual angle --" with "-- actual voltage/phase angle --".

In claim 28, please replace the text "-- according to claim 28 --" with "-- according to claim 27 --".

2. The following is an examiner's statement of reasons for allowance:

Claims 1-10 and 12-22 are allowed because none of the prior art of record discloses or suggests a method comprising determining an actual voltage and phase angle in the electrical power system, determining a power unbalance within at least one sub-area in the electrical power system, determining suitable power-balancing measures, dimensioning an extent of the respective measure, and carrying out the power-balancing measures, in combination with the remaining claimed features.

Claims 23-24 are allowed because none of the prior art of record discloses or suggests a device comprising actual voltage/phase angle determining means arranged for determining an actual voltage/phase angle in the electrical power system, power unbalance determining means arranged for determining a power unbalance within at least one sub-area in the electrical power system, power-balance measure determining means arranged for determining suitable power-balancing measures, dimensioning means arranged for dimensioning the extent of the respective measures, and restoring means arranged such that the selected measures can enable the electrical power system to be restored to a stable condition, in combination with the remaining claimed features.

Claims 25 and 27-28 are allowed because none of the prior art of record discloses or suggests a computer program product comprising a computer readable medium; and computer program instructions recorded on the computer readable medium and executable by a processor for carrying out a method comprising determining an actual voltage/phase angle in the electrical power system, determining a power unbalance within at least one sub-area in the electrical power system, determining suitable power-balancing measures, dimensioning an extent of the respective measures, and carrying out the power-balancing measures, in combination with the remaining claimed features.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

3. Applicant's arguments, see Remarks, filed October 7, 2009, with respect to the objections to the specification, drawings, and claims have been fully considered and are persuasive. The objections have been withdrawn.
4. Applicant's arguments, see Remarks, filed October 7, 2009, with respect to the rejections of claims 1-5, 8-25, and 27-28 under 35 U.S.C. 112, second paragraph, 102(a), and 103(a) have been fully considered and are persuasive. The rejections of claims 1-5, 8-25, and 27-28 have been withdrawn.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The US patent of Schneider et al. (4,075,699) discloses a device and method for determining and dimensioning measures for restoring an electrical power system which experiences or is heading for a voltage collapse, comprising determining power consumption (watts), rather than voltage and phase angle, in the electrical power system, and dimensioning an extent of power-balancing measures based on power consumption. The US patent of Sullivan, II et al. (4,324,987) discloses a similar apparatus and method that measures power, rather than voltage and phase angle, and sheds loads if the power exceeds a peak demand, until the power is less than the peak

demand, but does not dimension specifically how many loads must be shed before shedding the loads.
